

## Quick Coupler Use:

1. Turn on irrigation main line. This can be done by manually turning on the valve by the sidewalk or turning the controller on via the “manual operation” instructions on the inside cover of the controller.
2. Insert the quick coupler key into the slot on top of the quick coupler and twist.
3. Turn on the flow of water via the ball valve at the base of the quick coupler box.

## Cistern Water Use:

1. Attach hose to spigot at base of either cistern.
2. Turn handle of brass valve to line up with flow of water.
3. Water flow will stop when cistern is empty or valve is shut down.
